

VOLUNTEERING MATTERS ACTION EARTH - ENHANCED HEALTH GRANTS FOR 2018

Every project has health benefits simply by bringing people together and getting people active outdoors, connecting with nature. In 2018, we are able to offer a limited number of new enhanced grants of up to £500 for projects which deliver a significant health impact through working with people who have defined health or social needs.

To be considered a project that delivers the highest level of health benefits, and therefore potentially be eligible for the higher rate of grant (which is discretionary), the project must:

- a.) Principally involve people with defined health or social needs

Or

- b.) Be designed to benefit people with defined health or social needs.

By people with defined health or social needs we mean people:

- with dementia
- who are socially isolated
- with a mental health issue
- with a learning disability
- with a physical disability
- with diabetes, cancer, cardiovascular disease
- hospital, hospice patients / care home residents.

If you feel your project fulfils these criteria and you wish to be considered for the higher level of funding (up to £500) please contact Robert Henderson before applying at robert.henderson@volunteeringmatters.org.uk or call on T: 0131 622 7766
